

With over 60 generic medications, we offer an easy, convenient solution to your prescription needs and it's **FREE!** The prescription medication list is reviewed to add additional generics that are commonly used by members or that are newly released as generics. Keep checking back on the medication list, which is on the website at [www.nacshealthwellness.org](http://www.nacshealthwellness.org).

The Health & Wellness Center physicians are only allowed to dispense medications they have prescribed for patients. If you have a prescription you would like to have filled, you will need to schedule a visit and meet with the physician. If appropriate, the physician will prescribe and provide you with medication from the Center.

Please review the list below for the most up to date medications, which include both short-term (acute) and long term (chronic) medications.

#### **NACS Medication List – April 2016**
